

# THESE ARE MY FOUNDATIONAL SKILLS IN ADOBE PHOTOSHOP & ADOBE ILLUSTRATOR

---

## Photoshop Pieces

---

### 3d Cube

Before

After

A 3D cube made from a flat image using a mesh preset cube to make it 3D.

## Drink Can

A shadow was added to a can by copying the image, using free transform to resize and reposition the copy, and then darkening the image and applying a Gaussian Blur to the image.

## Collage

A collage made by placing images on top of each other and merging them to fit.

## Drop Shadow

A shadow was made by copying a wheel, darkening it and applying a blur

## Eye Color Change

**Before**

**After**

This eye was changed from gray to blue by adding a hue/saturation adjustment layer.

## Fire Text

## Glitter Wand

Before

After

A new brush was made using star shapes and the opacity was lowered to make a sparkle.

## Image inside text

Text was made with a transparent background and transferred to the image, by using a clipping mask.

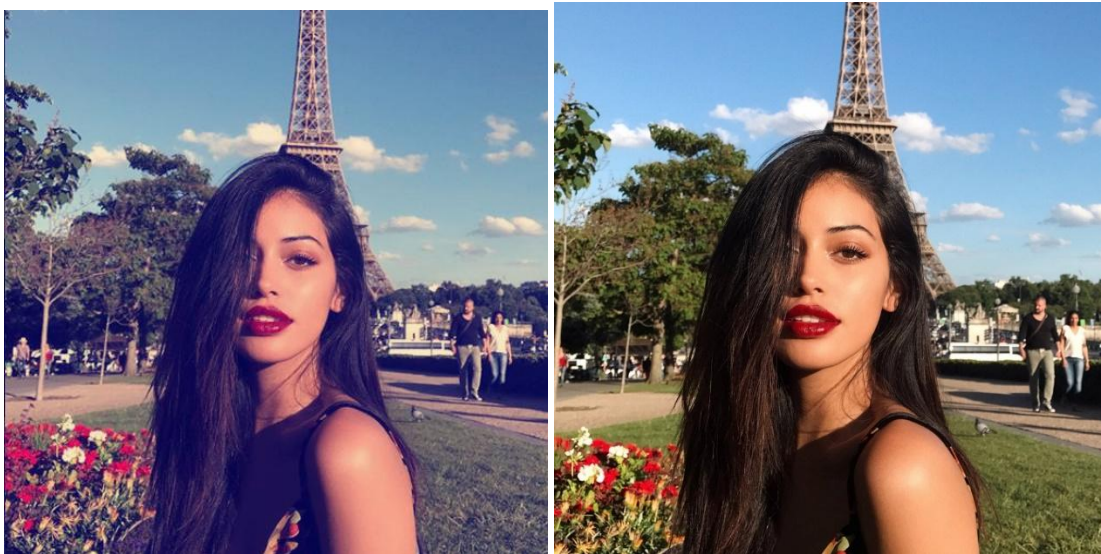

## Tattoo

A displacement mask was used to place the image on the woman forearm. That image was given a transparent background.

## Nashville Instagram Filter

A filter was made by using the levels and curves settings in Photoshop

## Pimple Fix

**Before**

**After**

A woman's pimples were removed using the Spot healing brush.

## Room Transformation

A room was transformed using various methods of free transformation, also with the use of the magic select brush, and my own discretion.

## Black and white image with highlighted color

Before

After

An image was converted to black and white and certain colors were highlighted using the eraser.

## Red T-Shirt to Blue T-Shirt

Before

After

A shirt was changed from red to blue by applying a hue/saturation layer on it in the Layer form.

## Liquify

Before

A woman was slimmed down using the liquify tool and Gaussian blur

## Soft Light

Before

After

A new layer was made into an overlay and gaussian blur was applied to create those effect.

## Red And Blue 3D Effect

Before

After

An image was duplicated and removed of its blue and green properties and then placed above the original image as an overlay. The overlay was then moved to the left and this effect was created.

## Rainbow

Before

After

A gradient brush stroke was converted to a smart object to achieve this picture.

## Snow

I used the noise tool in Photoshop to achieve this result.

## Rain

Before

After

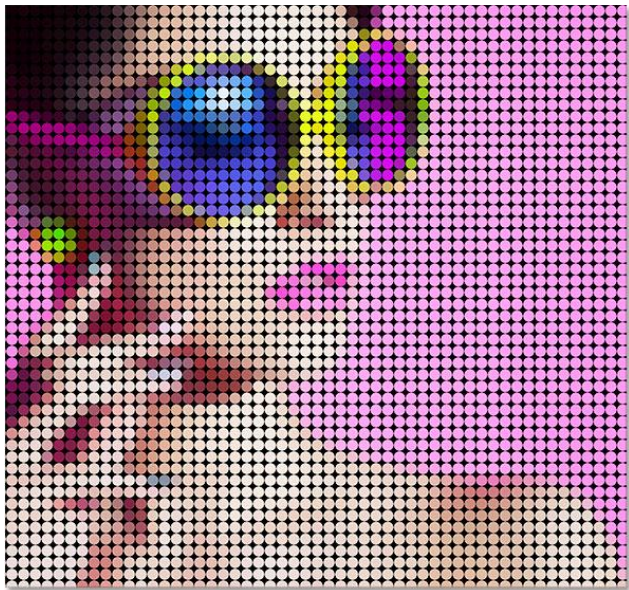

The noise filter was used as an overlay, along with Gaussian Blur to create an image.

## Vignette

This image was created using the outside/inside filter as an overlay, and by making the image a smart object, this effect was achieved.

## Dots

A mosaic was used as an overlay after making the original object a smart object and the mask was filled with a circle pattern.

## Watercolor

Before

After

The cutout filter was applied to the image which was converted to a smart object as an overlay.

# Illustrator Pieces

---

## Apple Logo with Gradient

I made two eclipses to make the original shape, and then I gave it a yellow-orange gradient and the pathfinder the join the two together. After that, I used the direct selected tool to bend the bottom, and the top and drew the stem with a pen.

## Bear Logo

I used various shapes and shading techniques to achieve this look.

## Carrot Icon

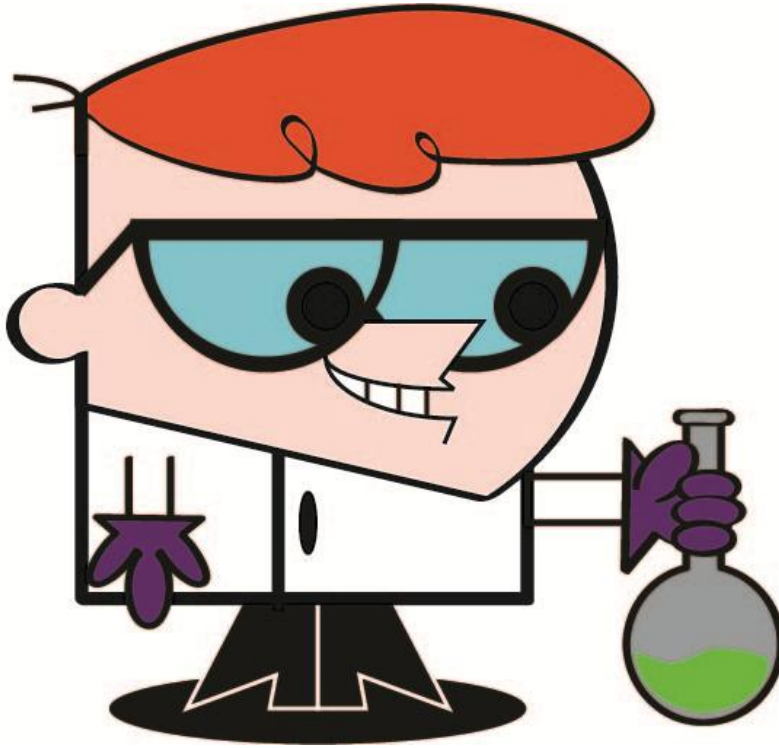

A carrot icon was made by drawing the outline of the carrot, and coloring the inside with a pen.

## Christmas Drawing

I drew a holiday donut by using several shapes like eclipses and pens.

## Dexter Drawing

I used several shapes, like ellipses, rectangles, rounded rectangles and polygons to make this popular cartoon character, Dexter from Dexter's Laboratory.

## Logo

This logo was made by manipulating ellipses and making spheres and other 3D objects.

## Polygonal Hummingbird

This bird was made by getting a picture of a hummingbird of the internet, and tracing its outline using the pen tool and intersecting line to separate it into triangles. When the hummingbird was drawn, then the triangles were filled with a white to blue gradient.

## Image to Drawing

Before

After

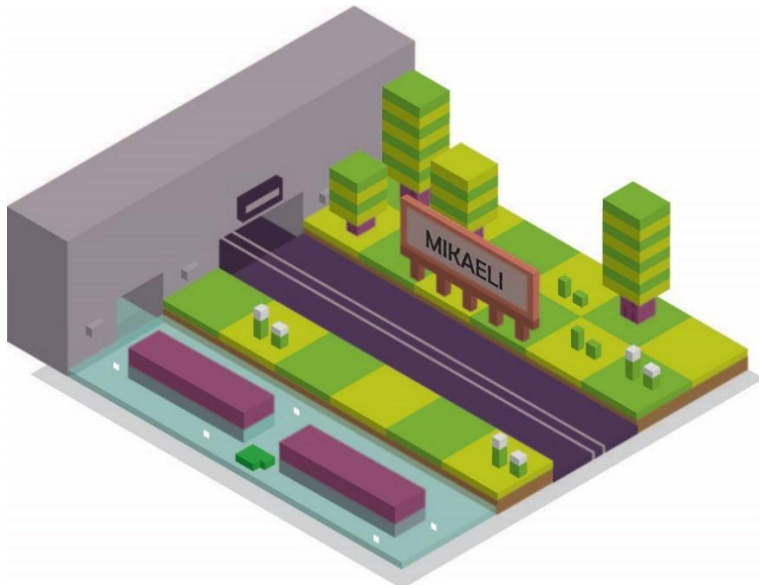

Using the Image Trace feature, I was able to convert a picture of the woman to a drawing.

## Peacock Logo

A simple peacock logo was made using the pen tool, the arc tool, the direct selection tool and the eclipse drawing tool.

## Isometric City

The city was made using various shapes, combining them to make 3D isometric objects.

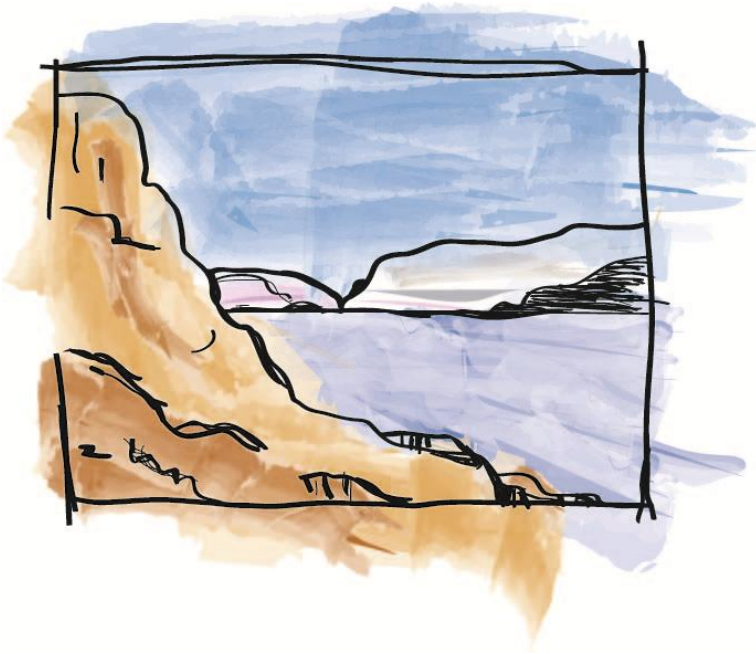

## Colorful Logo

This logo was made using triangles (polygons) and the opacity was lowered to make the final product.

## Waterpainting

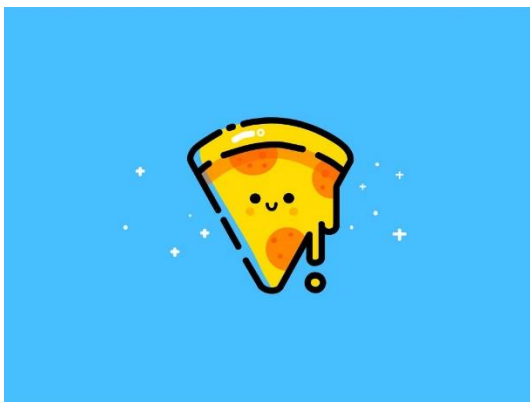

I drew the image using a pen and then I colored the images in using the watercolor brush set in Illustrator.

## Picasso Woman

I was inspired by Picasso's paintings, especially his characteristic asymmetry and the oversimplified body parts when I made this woman using various techniques to achieve this look.

## Pizza Icon

I drew this icon using the Pen tool.

### 3D Tree

I made a tree drawing, put gradients for the tree and the trunk and made it 3D.
